

Section - 6

Industry- Asphalt Batching Plants.

Typical chain application		Type of chains used
1- Hot stone bucket elevators		SS102B, SS111, SS110 & 603 chains
2- Inclined scraper conveyor		4" & 6" Shell roller chains.
3- Rotary mixer drum drives		3067X, API3P, API4P, & 1605AAA

Section - 7

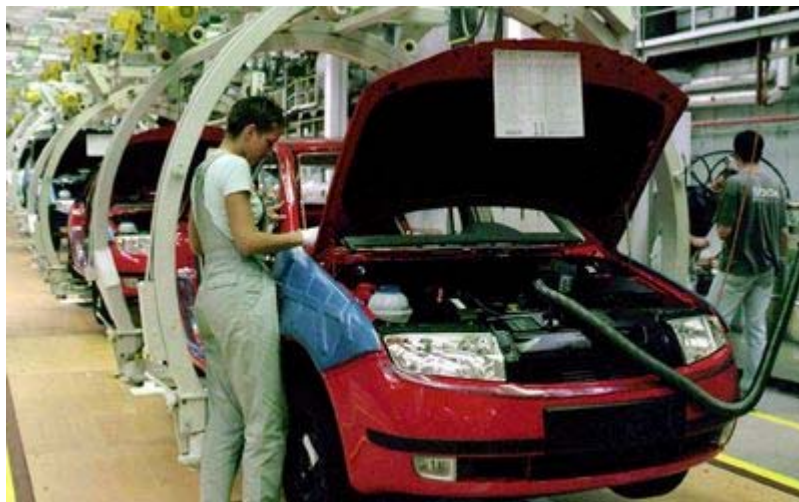

Industry- Assembly lines generally.

Typical chain application		Type of chains used
1 - Washing m/c's, Fridge, dryers, cookers & television overhead conveyors		348 & X458 forged rivetless chains.
2- Horizontal conveyors.		Light duty, hollow pin chains.

Section - 8

Industry- Automotive Assembly Lines. (Car, Truck, Coach, & Tractors.)

Typical chain application		Type of chains used
1- Over head, component conveyors		348, 458, 678, 698 & 998 forged rivetless chains.
2-Floor conveyors for assembled vehicles & paint shops.		4" – 12" pitch deep link chain, outboard roller chain / flanged roller chain. Formed top chain.

Section - 9

Industry- Bakeries.

Typical chain application		Type of chains used
1- Proving & baking ovens		6" Pitch steel roller chains
2- General conveying		½" pitch plastic chain, modular plastic belts.
3- Crate washing machines		CC600 & CC1400 plastic chains

Section - 10

Industry- Breweries, Beverage, Bottling & Canning.

Typical chain application		Type of chains used
1 - Bottle & can filling lines		Straight running & side flexing flat top chains. 3" to 7 1/2" wide, stainless steel & plastic
2 - Bottle & can labeling lines		Straight running & side flexing stainless steel & plastic, flat top chains.
3 - Accumulator tables		Plastic modular belts
4 - Crate & cask conveying and washing lines		Malleable and plastic CC600, Plastic CC1400 chains
5 - Bottle washing pasturising & sterilizing machines		4" & 6" Carbon & stainless steel roller chains.
